

Colour scheme

Redesign the website's color scheme using the **60-30-10 design rule**.

- **60% Primary Color:** A rich, deep red that serves as the dominant color throughout the website (backgrounds, major sections, key visual elements).
- **30% Secondary Color:** A dark beige/tan tone used to balance the red and create warmth and contrast (cards, content sections, panels, and supporting elements).
- **10% Accent Color:** A dark navy blue used sparingly for calls-to-action, interactive elements, highlights, links, and important visual emphasis.

Incorporate **subtle brown accents and highlights** where appropriate to add depth, sophistication, and cohesion between the red and beige tones.

Maintain a professional, modern, and visually appealing aesthetic. Ensure that all text remains highly legible with strong contrast against backgrounds. Prioritize accessibility and readability by selecting text colors that are easy to read on every section of the site. Avoid color combinations that reduce visibility or create eye strain.

Use the color palette consistently across buttons, navigation menus, cards, forms, icons, hover states, and other UI components while preserving a clean and balanced user experience. The overall feel should be warm, elegant, trustworthy, and refined.

Sequence

Reorganize the website layout by moving the "Our Philosophy" section so that it appears immediately after the "Core Pillars" section.

Maintain the existing design, styling, spacing, animations, and responsiveness of both sections. Ensure the transition between the Core Pillars and Our Philosophy sections feels natural and improves the overall content flow.

Update any navigation links, anchor links, scroll behavior, or section references as needed so that the website continues to function correctly across desktop and mobile devices. Keep all content unchanged unless necessary for formatting and layout consistency.

Survey

Replace the current **"Get Involved"** section at the end of the website with a new **"Share Your Thoughts"** or **"Anonymous Survey"** section.

The survey should allow visitors to submit responses **anonymously** to the following two open-ended questions:

1. **What is one thing you wish more people understood about supporting a friend who is struggling emotionally?**
2. **What would help teenagers feel more comfortable reaching out for support when they need it?**

Include a simple text input area for each question where users can type their own responses. The design should be clean, welcoming, and consistent with the rest of the website. Clearly indicate that responses are anonymous and that no personal information is required.

Below the survey, add a new **"Contact Us"** section for visitors who would like more information about the project.

Include the following contact methods:

Email: thelighthouseproject26@gmail.com

Instagram: @thelighthouseproject2026

Add the following message:

"Questions, feedback, or interested in learning more? Contact us via email or Instagram."

Ensure the survey and contact sections are fully responsive, visually aligned with the website's color scheme, and maintain strong readability and accessibility across all devices.
